AGREEMENT DENDROGRAM

I noticed that how I phrased the cards can influence the participants' sorting, and also in trying to simplify the wording, some of the cards are more ambiguous, which makes it hard to interpret.

The 11 participants came from all over the world, and had a good range of experience with houseplants. Some of the more beginner participants did not know how to sort some of the more advanced terms, the more experienced participants sorted the cards into larger groups with less distinction/categories.
